

Heng Balance Lamp

“ Switch in mid-air ”

In balance

"Heng Balance Lamp" is a series of desk lamps with a twist: where most lamps have a standard switch the Heng Balance Lamp is controlled by two wooden balls. When you lift the lower wooden ball, it will be attracted by the hanging one and remain suspended in mid-air, switching on the light.

Versatile

This creative small lamp is suitable for the study, bedroom, etc. Most types of rooms will benefit from this lamp, as besides a source of light it is also a piece of art.

Design

We adopted a design where the lighting element is embedded into the frame so the light can find its way out. The gentle curve makes it easy to the eye and calming.

Materials

The frame of the lamp is either made of ABS plastic or solid beech. Both are high-quality materials with unique advantages: the ABS plastic version is available in multiple colors and offers a modern touch, while the wooden version is available in either light or dark varnish and provides a more natural feeling.

Red Dot Award

Li Zanwen won the 2016 Red Dot Award and the Red Dot Award Best of the Best with the Heng Lamp. He feels that having a vivid imagination is the key to designing a great product.
